

PMT Courses - A-level Refresher Courses 2022

These three-day online courses are designed to give students who are going into Year 13 a head start in the new academic year. Tutors will review all Year 12 material, refreshing knowledge of content which may have been forgotten over the summer.

Our summer courses take place **online** using Google Classroom.

Course	Dates	Timetable & Booking

Physics OCR (A)										

How do our online courses work?

- We use Google Classroom for our online courses. Students are sent the link to join the Classroom the day before the course starts.
- Inside the Classroom students will find digital copies of all the handouts.
- The lessons take place on Google Meet. On the morning of the course, the Meet link will be shared in the Classroom's stream.
- Lessons are recorded and saved in the Classroom for students to revisit whenever they wish. Any resources used by teachers during the course are also saved in the Classroom.
